MEGACITIES

The Cityscape project is dedicated to the Human race and the impact we have on the planet. Fascinated with the rapid change of urban landscapes in the Megacities around the world and the cluster in which Architects and Urban planners are trying to create living spaces for the ever-growing demand of shelter. What he finds most inspiring is the surreal, artificial atmosphere that takes hold of these cities at night, represents all show the nocturnal hustle and bustle of Dubai, Hong Kong, Shanghai, Tokyo and New York. The lighting on the streets and in buildings symbolizes all this activity and yet the same lighting that creates the abstract and surreal image of a city that never sleeps also epitomizes in its artificiality an unmistakable loneliness.
